

## The Tyburn by Martin Brudnizki

**Description** The Tyburn bath is the centrepiece of Drummonds' exclusive collection with Martin Brudnizki. A departure from cast iron, the bath is formed from 80% natural stone which allows its sweeping curves and silky smooth finish. Symmetrical on the outside, The Tyburn has an asymmetric interior with two differently-shaped ends; one sloped for reclining and one more upright for sitting up. The profile features a distinctive rounded edge, subtly scooped for a comfortable headrest when bathing. The Tyburn is a stream in London, which runs underground from South Hampstead through St James's Park to meet the River Thames. The Ty- in Tyburn derives from a word for "boundary".

### Price

Finish	With Overflow Hole	Without Overflow Hole	£ (exc. VAT)
Natural Stone	DAD1043WHO	-	4,985

### Specification

Length:	1750 mm
Width:	790 mm
